Helping you to Be, to Belong and to Become

## OT HOME MODIFICATIONS ASSESSMENT

*Change The Space, Change The Life.*

Modifications to the home, whether minor or complex, can create game-changing solutions and greatly impact overall quality of life.

Our experienced team of Occupational Therapists specialise in both minor and complex home modifications for individuals with a wide variety of disabilities and medical conditions. The aim of our home modification service is to facilitate our clients to do what they need and want to do, in the most effective and safe manner, within their home environment. Our OTs provide a personalised service and approach, working directly with our clients to empower them throughout the whole process.

### What Home Modification Solutions Exist?

There are often simple modifications that can make a world of difference. These may include:

- Installing grab rails in bathrooms and toilets
- Installing a hand-held shower hose in the shower
- Modifying tapware in bathrooms and kitchens
- Installing handrails on stairs and paths

### More extensive complex home modifications can include:

- Modifying bathrooms including removal of a shower hob to install a stepless shower recess
- Modifying kitchens including removing cabinetry to enable wheelchair access
- Installing stair climbers, platforms lifts or vertical lifts to access multi-level homes
- Eliminating mobility inhibitors by levelling or widening doorways

### What Do Home Modifications Cost?

The cost for home modifications varies considerably depending on the nature and scope of the works to be undertaken. Verve OT have facilitated funding approvals on projects upwards of \$300,000. Our team of OT's can connect with trusted builders to obtain competitive quotations, then facilitate funding approval via government funded schemes such as the NDIS.
