

OT TRAINING FOR NDIS OTS

Navigating the NDIS, particularly within a therapy setting, can be both rewarding and challenging for many occupational therapists.

The availability of affordable professional clinical training and supervision has been limited to date. However, with the increasing demand for services, the need for quality and expert occupational therapy training has never been more necessary. Verve OT offer a range of clinical and non-clinical training session designed to upskill OTs working in the NDIS space. With both on-demand and live training workshops available, there is a topic of interest for every NDIS OT.

NDIS 101 – The Basics & Practical Skills

This workshop will assist OT's to understand the basics needed to navigate the NDIS. Understand your planner from your plan manager, the three C's and more. This workshop will also provide an overview in relation to the therapeutic use of self, case management, time management, the initial assessment and other toolkit items.

Life Skills Training for NDIS OT Providers

This workshop is aimed to equip OT attendees with the knowledge and skills required to implement Life Skills Training with clients with disabilities, including (but not limited to) those with conditions such as Intellectual Disability, Autism Spectrum Disorder, Neurological Conditions and Developmental Delay. This session is suitable for any OT wanting to develop their skills in this area with adolescent and adult clients.

Sensory Processing for Adults – Assessment & Intervention

Sensory Processing assessment should form part of the holistic assessment process OTs complete when working with all adults in disabilities. This session will focus on equipping attendees with the knowledge and skills to complete sensory assessments, interventions and how to compile this information into a report when working with adult clients with disabilities.

The Restrictive Practice Puzzle

With the advent of the NDIS Quality and Safeguarding Commission, the rules around restrictive practices have become complex. This workshop is designed to assist OT's to respond to restrictive practices appropriately and in accordance with the legislation.

SIL & ILO Housing Options 101 for NDIS OT Providers

What is the OT role in assessing for SIL/ILO? This workshop will explore how OT's can assist in providing evidence for eligibility, identifying required level of supports, utilising standardised assessments and making recommendations for capacity building.

Thermomix Prescription 101

This interactive workshop will review the clinical considerations when prescribing a Thermomix including how it can increase independence in meal preparation, preparation of evidence of clinical reasoning and provision of reporting to the NDIS. The session will include a case study and 'nuggets of gold' provided by the NDIS Technical Advisory Team.

Bidet Prescription 101

Bide Prescription 101 will aim to de-mystify this piece of toileting AT by unpacking the who, what, when, where, how and why's! OT's will gain increased confidence to go forth in prescribing bidets for their clients.

NDIS Functional Assessments 101

This workshop will provide attendees with increased knowledge and understanding in delivered comprehensive functional assessments. Including what a functional assessment entails, when it should be completed, how to conduct the assessment and preparation of the report.
